## Online Driver Profiling Risk Assessment System

### Overview/Description

Driving is a high risk activity that most of us do each day. All new Bridgeway staff undertaking driving as part of their duties attend a Bridgeway Safe Driving Module as part of their company safety induction. This also includes an Online Driver Profiling and Risk Assessment

### Key Principles of the Online Driver Profiling Risk Assessment:

The key principles for the Online Driver Profiling Risk Assessments are:

- Multiple choice questions to determine the drivers attitude towards driving and The Highway Code
- Questions with road scenes to determine the drivers observational skills
- Road scenes shown to measure the drivers risk and hazard perception.

### Benefits of the Online Driver Profiling and Risk Assessment

- High risk drivers are identified so they can be monitored
- High risk drivers receive additional training and assessments - to be provided by Bridgeway RoSPSA Qualified Driving Assessors.
