

 	<p style="text-align: center;">St Mungo's 'Putting Down Roots'</p> <p style="text-align: center;">Benefits Received (Costain / Project / Customer)</p>
<p>Description</p> <p>At London Bridge Station we have developed a relationship with St Mungo's 'Putting Down Roots' which is a Southwark charity that creates garden furniture that is used in local community gardens.</p> <p>London Bridge, as part of their relationship with 'Putting Down Roots', donates off cuts of timber, that would otherwise become waste from our site, to the charity who then reuse it in their community gardens. To date we have donated 10 lots of surplus wood, some of which has been made into furniture and used in garden projects such as the White Grounds Estate.</p> <p>Not only do these charitable donations encompass the social legacy of the project but we are aiding the redevelopment of green spaces and encouraging the increase of biodiversity within the area, thus focusing on environmental regeneration.</p> <p>St Mungo's garden furniture creates perfect habitats for small invertebrates. By maximising the habitats within the area contributes towards the project's "no net less" objective as part of our contractual requirements.</p> <p>Additional to our timber donations, in 2014 we donated a £1500 chop saw to aid their activities and further gardening projects.</p>	<ul style="list-style-type: none"> • CEEQUAL – ecology and biodiversity; new wildlife habitats; net increase in area; conservation and enhancement of biodiversity. • Enables us to meet our objectives of 'no net loss of biodiversity' and 'Supporting local communities in green infrastructure' as part of London Bridge BAP. • Increases local aesthetic value which encourages the use of natural open spaces • Ensures no inadequate loss of an ecosystem service by allowing the timber to be reused sustainably.
